## Three Reasons Why Our Fans Are The Best In The Industry

### Excellent CCFM Per Watt (Circulating Cubic Feet per Minute)

We know how important energy efficiency is to your operation. That's why our fans offer CCFM/Watt ratings of up to 26.41

### Extra Amps to Spare

We know that in the real world fans get dirty. Very dirty. That's why we designed our fans to have a much higher maximum amp rating than the operating amp rating. This allows the fan to continue to operate perfectly when dirty instead of burning out the motor.

### Sealed Motor

Life in a confinement building is harsh if you're a fan motor. That's why our fan motors are sealed to keep out environmental dust to allow our fans to keep running at their full potential.
